

## Statewide System of Support for School Improvement

The Idaho Building Capacity project is designed to serve the needs of a selected group of school districts struggling to meet adequate yearly progress. While we are scaling up to provide IBC in all areas of Idaho, staffing and funding issues prevent it from being offered to *all* schools and *all* districts. To provide statewide support, the Strategic Plan for a Statewide System of Support for School Improvement was created. The system is based on *Nine Characteristics of High-Performing Schools*. The strategic plan incorporates the next three years of statewide school improvement.

### Year 1—2008-2009

Month	Content
<b>September</b> <i>Clear Focus</i>	Introduction to <i>Nine Characteristics of High-Performing Schools</i>  Roles & Alignment (Change Conversation)  Overcoming Resistance  Decision Making
